

# Daimôn

Le Centre de production Daimôn supports artistic and technological exploration for both experimentation and dissemination. The integration of production facilities available at the centre enables artists to explore image, sound and movement in one setting, and to exhibit complex works that use a variety of media.

Founded in 1986, Le Centre de production Daimôn is an artist-run centre with a mission to support artistic inquiry and creation, production, and dissemination in the media arts field, focusing on video, audio and photography.
