

Factory Media Centre

The mission of the Factory Media Centre is to develop and support a vibrant, sustainable, creative and diverse community of members and non-members within Hamilton and its surrounding region, who are involved or interested in the art, the craft and the technologies of, but not limited to, the motion picture medium, including all forms of time-based media.

The Factory Media Centre is an artist-driven resource centre dedicated to the production and promotion of creatively diverse forms of independent films, videos and other streaming multimedia art forms.

The Factory Media Centre exists to provide access to facilities, equipment, peer resources and educational initiatives to the community of time-based visual artists, as well as to the community at large. The Centre also encourages the development and appreciation of all related visual and time-based art forms through an ongoing program of screenings and events.
