

Sporobole

With art as a driving force, Sporobole assists artists and cultural organizations in their digital transition, promotes knowledge sharing and accessibility, encourages collaboration and innovation in the cultural sector, and emphasizes the role of artists in creating new knowledge.

We see artistic creation as an embodiment of cultural and social issues, we see art as a space for reflection, invention and free critical thinking, fostering the production of new knowledge;

We work to empower communities (artistic, self-managed, social action, hacker culture, etc.) facing issues raised by digital technologies;
